**MICRO
POLIS**

www.micropolis.fi

Circlab is a new research and development environment for circular economy and nutrient recycling solutions at Micropolis Oy's technology center in Ii, Finland. Circlab is a business ecosystem that creates concepts for products and services over the entire nutrient cycle. We want to enable companies an easy way to try new technologies and do new business using waste and sidestreams in microalgae cultivation and nutrient recovery. **KASKI** -Grow from movement with green technologies project.
